The National Association of Women in Construction was founded in 1952 by a group of 16 women in Ft Worth Texas who saw a need to assist each other in their day-to-day requirements as employees for construction companies. Today over 6000 women are members of this association whose core purpose is to "Enhance the Success of Women in Construction". Members are employed in all phases of the industry and include administrative personnel, tradeswomen, bankers, accountants, attorneys, insurance and bonding agents, project managers, material suppliers, contractors, etc. Tribute courtesy of Cedar City resident: Nancy A.
